COMBINED TECHNICAL SERVICES EXAMINATION (NON-INTERVIEW POST)

COMPUTER BASED TEST

DATE OF EXAM: 07.08.2025 FN

PAPER – II – ENVIRONMENTAL SCIENCE, BIOLOGY AND CHEMISTRY

(Code-557)

1. WBCSD denoted

- (*) World Business Council of Sustainable Development
- (B) World Biodiversity Conservation of Sustainable Development
- (C) World Business Conservation of Sustainable Development
- (D) World Biodiversity Council of Sustainable Development
- (E) Answer not known

2. Identify the mismatch

- (i) Forests A renewable resources
- (ii) Fossil fuels A renewable resources
- (iii) Fish A renewable resources
- (iv) Water A renewable resources
- (A) (i)
- (B) (iii)
- (C) (iv)
- (ii)
- (E) Answer not known
- 3. Diatomic oxygen is produced by Algae is a result of
 - (A) It's photosynthesis of water
 - (B) Photosynthesis of CO₂
 - (C) Oxidation of CO2
 - (D) Photoreduction of H₂O
 - (E) Answer not known

4.	The	Brundtland Commission report is concerned with:							
	(A)	Wat	ter con	servati	ion				
	(B)) Air pollution							
(C) Sustainable Development									
	(D)	Env	ironm	ental p	rotect	tion			
	(E)	Ans	wer no	ot know	n				
5.	Mat	ch co	rrectly	The er	nergy	sources with their corresponding:			
	(a)	KVI	\mathbb{C}		1.	Hydroelectric energy			
	(b)	Kalp	akkan	1	2.	Wind Energy			
	(c)	Bhak	kra Na	ngal	3.	Biogas			
	(q)	Mup	pandal	2	4.	Nuclear Energy			
		(a)	(b)	(c)	(d)				
	(A)	2	3	1	4				
	(B)	1		3	2				
	(C)	3	1	4	2				
	(D)	3	4	1	2				
	(E)	Ans	swer no	ot know	n				
6.	The	ener	gy whi	ch can	reduc	ee global warming is			
	(A)	Geo	therm	al ener	gy				
	(B)	Coa	.1						

Petroleum

Natural Gas

Answer not known

(C)

(D)

7.		ernment provides a scheme to reduce the expenditure for the tation of trees by offering land and this is known as
	(A)	Coppice system
	B	Taungya system
	(C)	Rotation of cultivation
	(D)	Mulching
	(E)	Answer not known
8.	Choo	ose the correct order of wind energy producing states in India.
	(A)	Tamil Nadu > Andhra Pradesh > Gujarat > Maharastra
	(B)	Andhra Pradesh > Maharastra > Gujarat > Tamil Nadu
	(9)	Tamil Nadu > Gujarat > Maharastra > Andhra Pradesh
	(D)	Maharastra > Tamil Nadu > Gujarat > Andhra Pradesh
	(E)	Answer not known
9.		many Sustainable Development Goals (SDGs) does the 2030 and for sustainable development have?
	(A)	5 (B) 10
	(C)	14 (2) 17
	(E)	Answer not known
10.	Phyt	coplankton living mainly in the region of
	(A)	Land
		Ocean
	(C)	Land-Ocean interface
	(D)	Soil
	(E)	Answer not known

11.	Bloo	d sucking lice and leeches are the characteristic feature of parasites.
	(A)	Endoparasites
	(B)	Hyperparasites
	(C)	Zooparasites
	9	Ectoparasites
	(E)	Answer not known
12.	The	largest ecosystem of the world is
	(A)	Grassland Ecosystem
	(B)	Great Lakes Ecosystem
	(2)	Oceans Ecosystem
	(D)	Forests Ecosystem
	(E)	Answer not known
13.	Spec	eific heat is defined as the
	(i)	Highest heat of fusion and heat of evaporation
	(ii)	Number of calories necessary to raise one gram of water in one degree centigrade
	(iii)	Highest heat of evaporation only
	(iv)	Number of calories necessary to raise one gram of water in 100 $^{\circ}\mathrm{C}$
		(ii) only
	(B)	(iii) and (ii) only
	(C)	(iii) only

(D) (iv) only

14.		ch one of the ucer?	following	is the	most	appropriate	term	for
	(A)	First order con	sumer					
	(B)	Top consumers	3					
	(9)	Transducers						
	(D)	Saprotrophs						
	(E)	Answer not kn	own					
15.	The	current CO ₂ con	tent in the	atmosp	heric a	ir is about		
	(1)	0.042%		(B	0.42	0%		
	(C)	0.032%		(D	0.05	2%		

- 16. Which of the following best describes denitrification?
 - (A) The conversion of ammonia to Nitrates
 - The conservation of nitrates to Nitrogen gas
 - (C) The conservation of Nitrogen to ammonia
 - (D) The conservation of Nitrites to ammonia
 - (E) Answer not known

17.	Which of the following is incorrectly paired?			
	1.	Xerosere	-	Dry habitat
	2.	Psammosere	_	Salty habitat
	3.	Halosere	_	Sandy habitat
	4.	Lithosere	_	Rock surface
		2 and 3		(B) 1 and 2
	(C)	2 and 4		(D) 1 and 3
	(E)	Answer not kı	nown	
18.		slugs that fee	d on	hain include millipede, woodlice, drug flies the dead (or) decaying plant and animal (D) Detritivores (D) Herbivores
19.	This	is true about t	he sec	ondary succession
	(A)	Follows prima	ry su	ecession
	(B)	Takes place or	n a de	forested site
	(C)	Is similar to p slower pace	rimar	y succession except that it has a relatively
	(D)	Begins on a ba	are ro	ek

20.	Polli	nation is a type of	
	(A)	Mutualism	(B) Commensalism
	(C)	Amensalism	(D) Competition
	(E)	Answer not known	-
21.	Which cycle		a major type of biogeochemical
	(a)	Carbon cycle	
	(b)	Oxygen cycle	
	(3)	Phosphorous cycle	
	(d)	Hydrological cycle	
	(A)	(a) and (b)	(B) (c) only
	(6)	(d) only	(D) (b) and (c)
	(E)	Answer not known	
22.	Asse	rtion [A]: An ecosystem is the	basic functional unit of ecology.
	Reas		organisms and their abiotic rganisms can exist without the
	(A)	[A] is true, but [R] is false	
	B	Both [A] and [R] are true an of [A]	d [R] is the correct explanation
	(C)	[A] is false, but [R] is true	
	(D)	Both [A] and [R] are true explanation of [A]	e and [R] is not the correct
	(E)	Answer not known	

23. Choose the correct matches of the regions of atmosphere

- 1. Troposphere -0-11 km
- 2. Stratosphere 11-50 km
- 3. Mesosphere 90 500 km
- 4. Thermosphere 50 90 km
- (A) 1 only is correct
- (1 and 2 are correct
- (C) 2 and 3 are correct
- (D) All are correct
- (E) Answer not known

24. In which layer of the atmosphere the ozone layer is located?

- (a) Troposphere
- (b) Stratosphere
- (c) Mesosphere
- (d) Thermosphere
- (A) (a) and (b)

(c) and (d)

(C) (b) only

- (D) (d) only
- (E) Answer not known

25.	Sedimentary rocks are of the following types:							
	(i)	Shales, sand stone and limestone						
	(ii)	Limestones, sand stone and slate						
	(iii)	Sandstone, shales and marb	le					
	(iv)	Sandstone, limestone and Ba	asalt					
	(A)	(i) only	(B) (ii) only					
	(C)	(iii) only	(D) (iv) only					
	(E)	Answer not known						
26.	An e	xample of sedimentary type o	f nutrient cycle is					
	(A)	Nitrogen cycle	(B) Carbon cycle					
	9	Phosphorus cycle	(D) Both (A) and (B)					
	(E)	Answer not known						
27.	Whi	ch of the following statements	are true about Igneous rocks?					
	(i)	Formed by cooling of molten	magma (lava)					
	(ii)	Formed by deposition of wea	thered minerals					
	(iii)	Formed by change of pre- pressure	existing rock through heat and					
	(A)	(i) and (iii) only	(B) (iii) only					
	(2)	(i) only	(D) (i), (ii) and (iii) only					
	(E)	Answer not known						

- 28. Assertion [A]: Oxygen originates by the process of photosynthesis Reason [R]: Oxygen is responsible for the formation of ozone.
 - (A) [A] is true, [R] is false
 - (B) Both [A] and [R] are true and [R] is the correct explanation of [A]
 - (C) [A] is false, [R] is true
 - Both [A] and [R] are true, but [R] is not the correct explanation of [A] is correct
 - (E) Answer not known
- 29. Which of the following statements about the ionosphere is correct?
 - I. It is the uppermost layer of the atmosphere.
 - II. The molecules and atoms of N_2 and O_2 in this layer absorb some of the solar radiation and become ionized.
 - III. This layer is responsible for reflecting back the radio wave transmitted from the earth.
 - (A) I and II

(B) I and III

🖋 II and III

- (D) I, II and III
- (E) Answer not known

- 30. Assertion [A]: The movement of lithospheric plates is driven by forces on the Earth's Surface.
 - Reason [R] : Molten magma inside the Earth causes the Lithospheric plates to move.
 - (A) [A] is true, but [R] is false
 - (B) Both [A] and [R] are true and [R] is the correct explanation of [A]
 - (A) is false, [R] is true
 - (D) Both [A] and [R] are true, but [R] is not the correct explanation of [A] is correct
 - (E) Answer not known
- 31. Assertion [A]: Major damage to ozone layer occurs in winter at polar stratosphere.
 - Reason [R] : In winter, tiny ice particles are formed that acts as catalyst to convert chlorine into ozone destroying form, chlorine monoxide.
 - Both [A] and [R] are true and [R] is the correct explanation of [A]
 - (B) [A] is true, but [R] is false
 - (C) [A] is false, [R] is true
 - (D) Both [A] and [R] are true, but [R] is not the correct explanation of [A] is correct
 - (E) Answer not known

- 32. The first step indicate in the development of dose-response relationship curve :
 - (a) Toxicological end point
 - (b) End point
 - (c) Start point
 - (d) Intermediate point
 - (A) (a) and (c)
 - (C) (b) only
 - (E) Answer not known

(D) (d) only

33. Match the following:

Compound

Effect

- (a) Estrogens
- 1. Brain asymmetry

(b) DDE

2. Sex Reversal

(c) PCB

- 3. Imposex
- (d) Tributytin
- 4. Metabolic Masculinization (Masculinization)
- (a) (b) (c) (d) 2 4 1 3
- (B) 4 1 2 3
- (C) 1 2 3 4 (D) 2 3 1 4
- (E) Answer not known

34.	In the context of toxicology, what does the NOAEL represent?										
	(a)	The lowest dose at which adverse effects are observed									
	(b)	The highest dose at which no adverse effects are observed									
	(c)	The dose that causes death in 50% of the population									
	(d)	The dose that causes a spercentage of the population	pecific toxic effect in a small								
	(A)	(b) only	(B) (c) only								
	S	(d) only	(D) (a) and (b)								
	(E)	Answer not known									
35.	The most commonly used pesticide Toxaphene is classified as a										
	(a)	Carbamate Pesticide									
	(b)	Organophosphate Pesticide									
	(c)	Organochlorine Pesticide									
	(d)	Antibiotic									
	(A)	(a) and (b)	(B) (c) and (d)								
		(c) only	(D) (d) only								
	(E)	Answer not known									
36.		Exchangeable Sodium Percen a and the United States is	tage (ESP) value of sodic soil in								
	(A)	< 10	(B) 10 – 15								
		> 15	(D) > 25								
	(E)	Answer not known									

37.	Which one of the following is not an oxidative form of arsenic?								
		+2	(B) -3						
	(C)	+3	(D) +5						
	(E)	Answer not known							
38.	Slud	Sludge bulking is controlled by							
	(A)	Chlorination	(B) Coagulation						
	(C)	Aeration	(D) Denitrification						
	(E)	Answer not known	*						
39.	The	organic material of the solid w	aste will decompose						
	(a)	By the flow of water							
	(b)	By the soil particles							
	(c)	By the action of microorganisms							
	(d)	By oxidation							
	(A)	(b) and (c)							
	(B)	(d) and (a)							
	(C)	(d) only							
	B)	(c) only							
	(E)	Answer not known							

40.		pH a ia are	nd E	lectrica	al Cor	nductivity (EC) values of saline soils in
	20 6	< 8.5 > 8.2	and and	$\geq 4 \text{ dSi}$ $\geq 3 \text{ dSi}$ $\geq 2 \text{ dSi}$ $\geq 1 \text{ dSi}$	m ⁻¹ m ⁻¹	
	(E)			ot knov		
41.	Am	moniu	m sul	phate i	is use	d for which type of cropping Land?
	(A)	Acid	ic			(B) Amphoteric
	(C)	Neu	tral			(P) Alkaline
	(E)	Ansv	ver no	ot knov	vn	
42.	Mat	tch the	follor	wing.		
	(a)	Mercu	ıry		1.	Itai-Itai
	(b)	Arsen	ic		2.	Minamata
	(c)	Cadm	ium		3.	Lead colic
	(d)	Lead			4.	Black foot
		(a)	(b)	(c)	(d)	
	(A)	2	3	4	1	
	(P)	2	4	1	3	
	(C)	2	1	4	3	

(D) 2

1

(E) Answer not known

3

4

43. Identify the sources of soil pollution							
	(i) Industrial effluents						
	(ii)	Eutrophication					
	(iii)	Unscientific disposal of nuclea	ar wa	aste			
	(iv)	Offshore oil drilling					
	(v)	Improper management of sept	tic sy	ystems			
	(A)	(i), (ii) and (iii)	(B)	(ii), (iii) and (iv)			
	(9)	(i), (iii) and (v)	(D)	(ii), (iv) and (v)			
	(E)	Answer not known					
44.	Matı	ared soil which are arranged in	a se	eries of zones is			
	(A)	Soil zones	(B)	Soil layers			
		Soil horizons	(D)	Soil benches			
	(E)	Answer not known					
45.	Tho	major chronic effect of noise is					
40.		encomment — in the control of the co					
	(A) (B)	Suppression of immune system Increase of blood sugar level	П				
	(0)	Enhancement of sensitivity of	the	body to adrenalin			
	(D)	Noise induced hearing loss	0110	souj to auronani			
	(E)	Answer not known					
46.	The	K quid waste from baths and kit	tchei	n is called			
		Sullage	(B)	Storm waste			
	(C)	Run off	(D)	Domestic sewage			
	(E)	Answer not known					

47.	The	colour of water is measured on the
	(A)	turbidity scale
	(B)	threshold scale
	(Ø)	Platinum-Cobalt scale
	(D)	Calcium Carbonate scale
	(E)	Answer not known
48.		hemoglobinemia is caused when drinking water contains high ls of ————.
	(A)	Fluoride
	(B)	Iron
		Nitrite
	(D)	Nitrate
	(E)	Answer not known
49	Grou	and water is especially prope to excessive hardness due to

- - (A) Calcium and sodium ions
 - Calcium and magnesium ions
 - Sodium and magnesium ions (C)
 - (D) Potassium and calcium ions
 - Answer not known (E)

- 50. What is the permissible ambient noise level in a residential area during night time?
 - (a) 40 dB
 - (b) 45 dB
 - (c) 50 dB
 - (d) 55 dB
 - (A) (a) and (c)
 - (a) and (b)
 - (C) (a) only
 - (D) (b) only
 - (E) Answer not known
- 51. Which of the following is NOT a secondary waste water treatment process?
 - (A) Screening
 - (B) Activated lagoons
 - (C) Trickling filters
 - (D) Anaerobic digesters
 - (E) Answer not known

- 52. Assertion [A]: Exposure of noise pollution adversely affects the physiological health of a person
 - Reason [R]: Exposure to noise pollution adversely affects the psychological health of a person
 - (A) [A] is true but [R] is false
 - (B) Both [A] and [R] are true, and [R] is the correct explanation of [A]
 - (C) [A] is false, [R] is true
 - Both [A] and [R] are true, but [R] is not the correct explanation of [A]
 - (E) Answer not known
- 53. What type of noise can be abated by providing lining on walls and ceiling with sound absorbing material?
 - (A) Source noise
 - (**B**) Reflection noise
 - (C) Structural noise
 - (D) Direct air-borne noise
 - (E) Answer not known

- 54. Which of the following statements are true about noise pollution.
 - (i) Moderate vibration lead to cyanosis (blue colouration of fingers)
 - (ii) Frequency noise of 50 to 60 dBA affects higher centres of brain.
 - (iii) Noise pollution causes both pathological and psychological disorder.
 - (A) (i) only
 - (B) (i) and (ii) only
 - (C) (iii) only
 - (i), (ii), (iii) only
 - (E) Answer not known
- 55. What type of reaction is responsible for the formation of secondary pollutants?
 - (a) Combustion
 - (b) Precipitation
 - (c) Photochemical reactions
 - (d) Condensation
 - (A) (a) and (b)
 - (b) (c) only
 - (C) (d) only
 - (D) (a) only
 - (E) Answer not known

56.	What is the unit used to measure the quantity of ozone content in the atmosphere?						
	(a)	Einstein Unit					
	(b)	Poise					
	(c)	Dobson Unit					
	(d)	Becquerel					
	(A)	(a) and (b)					
		(c) only					
	(C)	(d) only					
	(D)	(b) and (d)					
	(E)	Answer not known					
57.		When a nuclear power plant leaks radiation into the atmosphere It causes ————					
	(A)	Pollution					
	(B)	Bioaccumulation					
		Contamination					
	(D)	Climate change					

58.	Match	tho	f_011	oming
00.	Match	une	TOTI	gmwo

- (a) Aerosol 1. Denotes high level of water droplets
- (b) Fog 2. Liquid particulates
- (c) Mist 3. Colloidal-sized atmospheric particles
- (d) Smoke 4. Particulates from incomplete fuel combustion
- (b) (d) (a) (c) 3 2 1 4 2 3 1 4 (C) 2 3 4 1 (D) 3 2 1 4
- (E) Answer not known
- 59. Air Quality Index (AQI) is represented in ______.
 - (A) Unit of ppm
 - (B) Percentage (%)
 - (C) Unit of µg/m³ (microgram per cubic meter)
 - (b) Numbers
 - (E) Answer not known

60.	Match	air	pollution	incident	with	their	corresponding	pollutant
-----	-------	-----	-----------	----------	------	-------	---------------	-----------

- (a) Seveso
- MIC 1.
- (b) Bhopal
- SO_2 2.
- (c) London
- TCDD 3.
- (d) Chernobyl
- Cesium 4.
- (a) (b) (c) (d) 1 2 3
- (A) 4 2 1 3
- 3 1 2 4 1
- 3 4 2 (E) Answer not known
- Which of the following factor is not to be considered for taking 61. decisions based on assessment of significance of an impact?
 - (A) Magnitude
 - Prevalence (B)
 - Duration and frequency
 - Unaccountability
 - Answer not known (\mathbf{E})

- 62. The process of quantifying energy and raw material requirements, atmospheric emissions, water borne emissions solid wastes and other releases for the entire life cycle of a product, process or activity is known as
 - (A) Life Cycle Impact Assessment
 - (B) Life Cycle Interpretation
 - (2) Life Cycle Inventory
 - (D) Life Cycle Innovation
 - (E) Answer not known
- 63. Which type of ISO standards need for Life Cycle Assessment?
 - (A) ISO 14000
 - (B) ISO 14040
 - (C)_ ISO 14044
 - (P) Both (B) and (C)
 - (E) Answer not known
- 64. How many environmental parameters/factors used in Environment evaluation system method in EIA?
 - (A) 72
 - (B) 75
 - **(%)** 78
 - (D) 82
 - (E) Answer not known

- 65. Which of the following is incorrectly paired pertaining to the concept of environmental management system.
 - (A) P-Planning
 - D Demonstration
 - (C) C Performance Evaluation
 - (D) A-Improvement
 - (E) Answer not known
- 66. Assertion (A): Benzene is a known leukemogenic agent and is associated with the development of acute myeloid leukemia (AML).
 - Reason (R): Toluene increases benzenes leukemogenic effects by converting into ferric metabolites that damage bone marrow.
 - (A) (A) and (R) are true (R) is correct explanation of (A)
 - (B) (A) is True (R) is wrong
 - (C) (A) is False (R) is true
 - (A) and (R) are true but (R) is not the correct explanation of (A)
 - (E) Answer not known
- 67. Which of the following personal protective equipment is tested for performance at the Central Labour Institute, Mumbai?
 - (A) Fire extinguishers
 - (B) Safety signs
 - (f) Canisters Non Respiratory equipment
 - (D) Ventilation system
 - (E) Answer not known

- 68. Match the life cycle assessment types
 - (a) Cradle to Grave
- 1. From raw material to extraction to factory gate
- (b) Cradle to Gate
- 2. From raw material to final disposal
- (c) Cradle to Cradle
- 3. From factory gate to factory gate
- (d) Gate to Gate
- 4. Closed loop system where waste is reused as input

1	(a)	(b)	(c)	(d)
	2	1	4	3
(B)	1	2	4	3
(C)	2	3	1	4
(D)	1	2	3	4

- (E) Answer not known
- 69. In EIA, while assessing socio economic impacts, many factors are evaluated. Among them, which of the following is a demographic factor?
 - (A) Public awareness
 - (B) Public utilities
 - (2) Income and Education
 - (D) Land use pattern
 - (E) Answer not known

- 70. In EIA, if during the screening phase, a project is found not to require EIA clearance, it means:
 - (A) The project has passed detailed environmental prediction
 - The project falls outside the categories or thresholds defined in the EIA notification and hence does not legally require Environmental Clearance
 - (C) The project is free from any environmental regulation
 - (D) The project has been rejected by the regulatory authority
 - (E) Answer not known
- 71. Which option best describes the jurisdiction of the National Green Tribunal (NGT)?
 - (A) Can decide any Civil or Property dispute if environment is involved
 - (B) Hears only air and water pollution cases under IPC
 - NGT has jurisdiction over Civil cases involving substantial environmental questions arising from the implementation of specific environmental laws
 - (D) Can decide constitutional issues under articles 32 and 226
 - (E) Answer not known

- 72. As per Schedule VI of the Environment (Protection) Rules, 1986 what is the correct arsenic (AS) discharge limit for various water bodies?
 - (A) Max 0.1 mg/l for inland water; 0.5 mg/l for marine discharge
 - Max 0.2 mg/l for inland water, sewers, irrigation kind and marine areas
 - (C) Upto 1.0 mg/l in sewers; stricter for other types
 - (D) Limit applies only to inland water; other not specified
 - (E) Answer not known
- 73. Match the List I with List II pertaining to the National Ambient Air Quality Standards (NAAQS) 2009:

List I - Pollutants

List II – Concentration in Ambient Air, (Industrial, Residential, Rural and other areas)

- (a) Sulphur Dioxide (SO₂) 1. 40 μg/m³ (Annual)
- (b) Nitrogen Dioxide (NO₂) 2. 60 μg/m³ (24 hours)
- (c) Carbon Monoxide (CO) 3. 50 µg/m³ (Annual)
- (d) Particulate matter PM_{2.5} 4. 0.2 mg/m³ (8 hours)
- (a) (b) (c) (d) 3 2 1 4 2 3 4 1 3 2 (C) 4 1 2 (D) 1 3
- (E) Answer not known

- 74. Choose the right matches in Indian constitution to protect environment:
 - 1. Article 48 A
- Protect the Environment Forests and wild life
- 2. Article 51 A(g)
- Fundamental right of Industrial development

3. Article 21

- Protection of life and personal liberty
- 4. Article 51 A(b)
- Liberty of life
- (A) 1 and 2 are correct
- (B) 3 and 4 are correct
- (9) 1 and 3 are correct
- (D) 2 and 3 are correct
- (E) Answer not known

- 75. Which of the following statements regarding environmental protection in the Indian Constitution are correct?
 - 1. Article 48-A directs the state to protect and improve the environment and safeguard forests and wildlife
 - 2. Article 48-A is included under fundamental duties of citizens
 - 3. Article 51-A(g) imposes a duty on every citizen to protect the natural environment
 - 4. Both Article 48-A and 51-A(g) were added by the 42nd constitutional Amendment
 - (A) 1, 2 and 3 only
 - (P) 1, 3 and 4 only
 - (C) 2, 3 and 4 only
 - (D) 1 and 2 only
 - (E) Answer not known
- 76. Which of the following statements about the Air Act and its 1987 Amendment is correct?
 - (A) The Air Act was enacted to address water pollution in India
 - (P) The 1987 Amendment introduced the power of close down defaulty industries and included noise pollution within the Act
 - (C) The Air Act requires only Central Govt. approval for industrial emissions
 - (D) The Act doesnot allow citizens to take legal action against polluters
 - (E) Answer not known

77. Assertion [A]: The wildlife (protection) Act, 1972 prohibits the

harming of species listed in schedule I throughout

India

Reason [R]: Species listed under Schedule V of the Act are

offered the highest level of protection and cannot

be hunted under any circumstances.

(A) Both [A] and [R] are true, but [R] is the correct explanation of [A]

(B) Both [A] and [R] are true, but [R] is not the correct explanation of [A]

(C) [A] is true but [R] is false

- (D) [A] is false but [R] is true
- (E) Answer not known
- 78. Assertion (A): A recycler can store e-waste for upto 365 days without approval from the State Pollution Control Board (SPCB)
 - Reason (R): The e-waste management rules allow unrestricted storage for research and development activities
 - (A) (A) and (R) are true, (R) is correct explanation of (A)
 - (B) (A) is true (R) is false
 - (C) (A) is false (R) is correct
 - (A) and (R) are false
 - (E) Answer not known

- 79. Choose the correct statement(s) pertaining to the National Green Tribunal Act 2010.
 - Statement 1: A person who is or has been, a judge of the High Court or Chief Justice of a District Court.
 - Statement 2: Provided that a person who is or has been a judge of the sessions court shall also be qualified to be appointed as a Judicial Member.
 - Statement 3: The Tribunal shall consists of not less than ten but subject to maximum of twenty full time expert members, as the Central Government may, from time to time, notify.
 - (A) Both statement(s) 1 and 2 are correct
 - (B) Both statement(s) 2 and 3 are correct
 - (C) Only statement 2 is correct
 - Only statement 3 is correct
 - (E) Answer not known
- 80. Choose the correct pair in the following options regarding the sections and their role in the Biological Diversity Act 2002.
 - (A) Section 28 Establishment of State Biodiversity Board
 - (P) Section 38 Power of Central Government to notify threatened species
 - (C) Section 39 Constitution of Biodiversity Management Committee
 - (D) Section 40 Grants of Local Biodiversity fund
 - (E) Answer not known

- 81. Waste sharps can be treated by dry heat sterilization at a temperature not less than ————.
 - (A) 100 °C
 - (B) 125 °C
 - (C) 150 °C
 - (**b**) 185 °C
 - (E) Answer not known
- 82. Repairing of used electrical and electronic equipment as listed in Schedule I for extending its working life for its originally intended use and selling the same in the market or returning to owner is called as
 - (A) Recycling
 - (B) Reusing
 - (C) Refurbishment
 - (D) Renovation
 - (E) Answer not known

- 83. Match the provision with their respective section in Water Act? (a) Section 21 Power to give direction for 1. closure of industry Power to take samples (b) Section 23 2.(c) Section 33 A National 3. Appeal to Green Tribunal Power to enter any industry (d) Section 33 B 4. (b) (c) (d) (a) (A) 3 4 2 1 3 (B) 2 1 4 2 (C) 4 1 3 2 4 1 3 (\mathbf{E}) Answer not known
- 84. In which appraisal committee to decide whether a project should be under B1 or B2 category?
 - (A) Expert Appraisal Committee (EAC)
 - State Expert Appraisal Committee (SEAC)
 - (C) District Expert Appraisal Committee (DEAC)
 - (D) District Environmental Impact Assessment Authority (DEIAA)
 - (E) Answer not known

85.	Match List I with List II pertaining to the validity of environmental
	clearance in various projects

List I

(a) River Valley Project

(b) Mining

(c) Quarrying

(d) Area Development Project

List II

1. 5 years minimum period

2. Minimum validity period

3. 10 years

4. 30 years

(C) 2 3 4 1

(D) 4 1 3 2

(E) Answer not known

- 86. In potentiometric titrations, at the end point, the rate of change of the potential is ————.
 - (A) Moderate
 - (B) Low
 - (C) Minimum
 - (Maximum
 - (E) Answer not known

87. Specific conductance can be written as (If cell constant is one)

- (A) $k = \frac{1}{R}ohm^{-1}cm^{-1}$
- (B) $k = \frac{1}{R} \times l \ ohm^{-1}cm^{-1}$
- (C) $k = \frac{l}{a} ohm^{-1}cm^{-1}$
- $(\mathbf{y}) \quad k = \frac{l}{a} \times R \ ohm^{-1}cm^{-1}$
- (E) Answer not known

88. Measurement of the intensity of the scattered light as a function of the concentration of the dispersed phase forms the basis of ———.

- Turbidimetric analysis
- (B) Nephelometric analysis
- (C) Surface analysis
- (D) Qualitative analysis
- (E) Answer not known

89. Which of the following is the more sensitive turbidimeter?

- (A) Parr turbidimeter
- (B) Duboscq colorimeter
- Du Pont model 430
- (D) Spectrophotometer ER 430
- (E) Answer not known

90.		nductometry, the electrical conductivity is entirely due to the ment of
	(A)	Electrons
	(B)	Protons
	(C)	Neutrons
		Ions
	(E)	Answer not known
91.		n calculation is not necessary when determining the elemental osition from the raw data?
		Calculating the retention time of each element
	(B)	Correcting for blank values
	(C)	Calculating the weight percentage of each element
	(D)	Calibrating the instruments with standards
	(E)	Answer not known
92.		uid membrane electrode, the liquid ion exchanger is held in a s disc of ————.
	(A)	Solid material
	(B)/	Semi-permeable membrane
	(S)	Hydrophobic material

Hydrophilic material

Answer not known

(D)

- 93. Stack monitoring is applicable to
 - (X) Industrial Air Pollution
 - (B) Industrial Water Pollution
 - (C) Industrial Noise Pollution
 - (D) Industrial Labour Problems
 - (E) Answer not known
- 94. Which of the following is used in the FT-IR spectrophotometer, to process the energy sent to the sample?
 - (A) Sample cell
 - (F) Interferometer
 - (C) Moving mirror
 - (D) Diffraction grating
 - (E) Answer not known
- 95. Which among the following gases have ability to be repelled by magnetic fields?
 - (A) Oxygen
 - (B) Nitrogen
 - (C) Nitrogen dioxide
 - (D) Nitric oxide
 - (E) Answer not known

96.	In Gas chromatography, synthetic zeolites are called as				
		Molecular Sieve			
	(B)	Molecular ion			
	(C)	Polymer			
	(D)	Co-polymer			
	(E)	Answer not known			
97.	7. A process in which the solvent displaces the solute molecules t are adsorbed over the surface of adsorbent is known as				
	(A)	Separation			
	(B)	Elimination			
	(C)	Displacement			
		Elution			
	(E)	Answer not known			
98.		which chromatographic method, stationary phase is solid and the ile phase is liquid?			
	1.	Paper chromatography			
	2.	Thin layer chromatography			
	3.	Column chromatography			
	4.	High performance liquid chromatography			

(A)

1 and 2 only

2 and 3 only

1 and 4 only

1,2,3 and 4

Answer not known

- 99. The locating agent used to identify carbohydrate is
 - (A) Iodine Vapour
 - (B) Ninhydrin
 - (2) Alpha-naphthol
 - (D) Aniline
 - (E) Answer not known
- 100. The retention factor (R_f) value is defined as
 - $R_{\rm f} \ value = \frac{{\rm The \ distance \ moved \ by \ pure \ substance}}{{\rm The \ distance \ moved \ by \ the \ solvent}}$
 - (B) R_f value = $\frac{\text{The distance moved by the solvent}}{\text{The distance moved by pure substance}}$
 - (C) $R_f \text{ value} = \frac{\text{The length of the paper}}{\text{The mass of the substance}}$
 - (D) R_f value = The distance between solvent front and paper length
 - (E) Answer not known
- 101. Select the chromatography, which is used to diagnosis the inborn errors of metabolism.
 - (A) Column chromatography
 - (B) Thin layer chromatography
 - (C) Gas chromatography
 - Gas chromatography Mass spectrometry
 - (E) Answer not known

- 102. Which force is responsible for the separation of the components in descending paper chromatography?
 - (A) Gravitational force
 - (B) Magnetic force
 - (C) Centrifugal force
 - (Capillary action
 - (E) Answer not known
- 103. If the two analytes present in the sample are of similar chemically choose the suitable chromatographic technique for separation.
 - (A) Partition Chromatography
 - (B) Adsorption Chromatography
 - (f) Chiral Chromatography
 - (D) Gel Chromatography
 - (E) Answer not known
- 104. R-bands originates due to
 - (A) conjugated π system
 - (B) $n-\pi^*$ transition single within a chromophore such as -C=O
 - (C) $\pi \pi^*$ transition in aromatic (or) heteroaromatic compound
 - (D) Electronic transitions in the benzenoid systems
 - (E) Answer not known

105.	The	IR region most widely used for quantitative analysis is
		Near IR
	(B)	Mid IR
	(C)	For IR
	NAME OF THE OWNER OF THE OWNER OF THE OWNER OF THE OWNER	All of the above
	(E)	Answer not known
106.	The t	typical time taken in FT-IR to acquire a single interferogram is
		less than a second
	(B)	several minutes
	(C)	1-2 hours
	(D)	10-15 minutes
	(E)	Answer not known
107.	The and -	measurement of intensity of fluorescent x-rays provide a simple ————————————————————————————————————
	(A),	Destructive, quantitative
	(B)	Non-destructive, quantitative
	(C)	Destructive, qualitative
	(D)	Non-destructive, qualitative

Answer not known

- 108. The cathode of transmission electron microscope consists of a
 - (A) Tungsten wire
 - (B) Bulb
 - (C) Iron filament
 - (D) Gold wire
 - (E) Answer not known
- 109. Choose the correct sequence with regard to the functioning of a flame photometry?
 - Sample residue → Excited state atoms → Return in ground state → Emission of radiation
 - (B) Sample residue \rightarrow Ground State \rightarrow Excited state \rightarrow Emission of radiation
 - (C) Emission of radiation \rightarrow Excited state \rightarrow Ground State \rightarrow Sample residue
 - (D) Sample residue \rightarrow Ground State \rightarrow Excited state \rightarrow Emission of radiation
 - (E) Answer not known
- 110. What is the role of ozone in a sulphur chemiluminescence detector?
 - (A) It acts as a catalyst for the reaction
 - (B). It is used to oxidize sulphur compounds to sulphur monoxide
 - (2) It helps to quantity sulphur light
 - (D) It is a component of the carrier gas
 - (E) Answer not known

111. Predict the λ_{max} values for

- (A) 222 nm
- (**B**) 227 nm
- (C) 232 nm
- (D) 247 nm
- (E) Answer not known
- 112. Which among of the following molecules is most likely to exhibit fluorescence?
 - 1. Conjugated double bond molecules
 - 2. Aliphatic saturated molecule
 - 3. Aliphatic saturated cyclic molecule
 - (A) All the three
 - (P) 1 only
 - (C) 2 and 3 only
 - (D) 3 only
 - (E) Answer not known
- 113. In Atomic Absorption Spectroscopy (AAS) non-metal can be determined by _____ method.
 - (A) Direct method
 - (B) Emission method
 - (C) Scattering method
 - Indirect method
 - (E) Answer not known

	wavelength of UV radiation falls in the regions of pectrum.			
0.000	4000 - 2000 Å $8000 - 2000 Å$ $4000 - 3000 Å$ $8000 - 3000 Å$ Answer not known			
5. Cu ²⁺ was combined with a chelating agent. The fluorescing chelat gave a slope of 15 intensity units per 1.0 mg/lit of Cu ²⁺ an interrupted the origin. Calculate the Cu ²⁺ concentration in the system which gave an intensity reading of 90.				
(A) (B) (C) (E)	3.0 mg/lit 4.0 mg/lit 5.0 mg/lit 6.0 mg/lit Answer not known			
In C	OD measurement, $Ag_2 SO_4$ solid is added to			
(A) (B) (C) (D)	Catalyze the oxidation of aliphatic, aromatic hydrocarbons To avoid interference of chlorides Indicate the end point To acidity the solution			
	the s (A) (B) (C) (D) (E) Cu ²⁺ gave inter syste (A) (B) (C) (E) In Co (B)			

Answer not known

- 117. Which one of the following is used as the reference turbidity standard suspension as per ISO standards?
 - (A) muddy water
 - (B) Flour water mixture
 - (f) Formazin polymer
 - (D) Milk of magnesia
 - (E) Answer not known
- 118. A clear sample of water is boiled to dryness in a container. After drying, the weight of the container was found to increase. This increase gives the measure of
 - (A) Suspected solids
 - (B) Dissolved solids
 - (C) Volatile solids
 - (D) Fixed solids
 - (E) Answer not known
- 119. A water sample taken from different areas and at different depths and then mixed together is called
 - (A) Grab sample
 - Composite sample
 - (C) Integrated Sample
 - (D) Representative Sample
 - (E) Answer not known

120.		is the colour of water and wastewater most commonly sured?
	(A)	using Munsell colour system
	(B)	through CIE Lab colour scale
	(2)	by platinum-cobalt colour scale
	(D)	using RGB colour model
	(E)	Answer not known
121.	Why	is flavor more complex than taste?
	(4)	It includes taste, smell and nerve sensations
	(B)	It is only about tongue sensations
	(C)	It ignores smell and mouth feel
	(D)	It depends on visual cues
	(E)	Answer not known
122.	The	dichromate oxidation method is used to determine
	(A)	DO (B) TDS
	(C)	BOD (Z) COD
	(E)	Answer not known
100	1171	
123.	Why	is the term "true colour" used for watercolour measurement?
	(A)	It represents the colour of water including suspended particles
	(B)	It is the colour of water after turbidity is removed
	(C)	It measures colour caused only by suspended matter
	(D)	It refers to colour measured without filtration
	(E)	Answer not known

<								
124.	Which one of the following statements is False about 'Turbidity'?							
	(A)	A) Turbidity measures the scattering effect that suspended solid have on light						
	(B)	Turbidity is measured in FTU (c	or) NTU					
	(C)	✓It is measured by nephelometers	3					
	(b)	Turbidity is NOT Time sensitive						
	(E)	Answer not known						
125.	The	threshold odour test determines o	odour by:					
	(A)	Measuring odour in undiluted sa	amples directly					
	(B)	Diluting samples until odour is j	ust detectable					
	(C)) Using one tester without calibration steps						
	(D)	Ignoring individual sensitivity d	ifferences					
	(E)	Answer not known						
126.	Plati	inum Cobalt scale is the measure	of					
	(A)	Suspended solids (I	B) TDS					
	(C)	DO	Colour					
	(E)	Answer not known						
127.		EDTA titration to determine the at the pH of	e hardness of water is carried					
	(A)	, 6 (I	3) 8					
	(2)	10 (I	O) 12					
	(E)	Answer not known						

128.	The	most essential requisite for accurate gravimetric analysis that						
		Analyte mass proportional to measured mass						
	(B)	The analyte must change colour during analysis						
	(C)	The analyte must react with n	nultiple reagents					
	(D)	The volume of solution must b	e measured precisely					
	(E)	Answer not known						
129.	DMG	is used as precipitant in the g	ravimetric estimation of					
	(A)	Pd^{2+}	(B) Zn ²⁺					
	(C)	Al ³⁺	(D) Cu ²⁺					
	(E)	Answer not known						
130.		is an example for a Chel	ate forming precipitant.					
		Oxine						
	(B)	Benzidine						
	(C)	Tetra Phenyl arsonium chlorid	le					
	(D)	Ammonium oxalate						
	(E)	Answer not known						
131.	What invol		t common precipitation reaction					
	(A)	Redox reaction	(P) Metathesis reaction					
	(C)	Combustion reaction	(D) Acid base reaction					
	(E)	Answer not known						

132.	The most suitable precipitant for estimation of Ni ²⁺ is						
	(A) (C)	Cupferron EDTA	(B) Oxime (D) DMG				
	(E)	Answer not known	(P) DITIO				
133.	'Hydı	the particles involved in					
	(A)	Post precipitation	(B) Condensation				
	(C)	Frontal precipitation	(D) Coprecipitation				
	(E)	Answer not known	,				
134.	134. The condition for a precipitation to occur is						
		Sonic product > Solubility prod	duct				
	(B)						
	(C) Sonic product < Solubility product						
	(D)	Sonic product not related to so	lubility product				
	(E) Answer not known						
135.	In th	nd FeSO ₄ , there is a change in					
	(A)	pH	(X) Oxidation potential				
	(C)	Temperature	(D) Total alkalinity				
	(E) Answer not known						

136.	Totally how many water molecules present in the sodium Tetra borate and Copper Sulphate?							
	(4)	15	(B)	17				
	(C)	20	(D)	10				
	(E)	Answer not known						
137.	Titra	ations using Ag NO3 as titrant a	are t	ermed	as			
	(A)	Ajinometric titrations						
	(B)	Acid - base titrations						
		Argentometric titrations						
	(D)	Fluid Analysis					19	
	(E)	Answer not known						
138.		he neutralisation titrations, i rolytes the pH of the solution a						strong
	(A)	14						
	(B)	1						
	(C)	3						
	(D)	7						
	(E)	Answer not known						
139.	The	titration which involves transfe	er of	electro	ns			
	(A)	NaOH vs HCl						
	(B)	NaOH vs Acetic Acid						
	(C)	EDTA vs Mg^{2+}						
	(B)	$ m K_2Cr_2O_7~vs~FeSO_4$						
	(E)	Answer not known						

- 140. EOSin is an indicator used in
 - (A) Sodometric titrations
 - (B) Complexometric titrations
 - (C) Redox titrations
 - Precipitation titrations
 - (E) Answer not known
- 141. Murexide and Bromopyrogallol Red Indicators are used to detect the metal Iron
 - (K)
- Ni^{2+}
- (B) Zn²⁺
- (C) Mg²⁺
- (D) Fe²⁺
- (E) Answer not known
- 142. The process in gravimetric analysis where a precipitate is allowed to form larger and purer particles is called
 - (A) Digestion
 - (B) Occlusion
 - (C) Adsorbate
 - (D) Precipitation
 - (E) Answer not known

- 143. Which of the following is NOT a correct pair?
 - (I) Volume % g solute/100 g solution
 - (II) Weight to vol% g solute/100 ml solute
 - (III) Parts per million g solute/106 g solution
 - (IV) Parts per billion g solute/109 g solution
 - (I) (I)
 - (B) (II)
 - (C) (III)
 - (D) (IV)
 - (E) Answer not known
- 144. Assertion [A]: It is difficult to obtain an ideal primary standard.
 - Reason [R]: Therefore, substances with characteristics close to primary standards are used.

Which of the following is correct?

- (A) Both [A] and [R] are true and [R] is correct explanation of [A].
- Both [A] and [R] are true, but [R] is not the correct explanation of [A].
- (C) [A] is true, but [R] is false.
- (D) [A] is false, but [R] is true.
- (E) Answer not known
- 145. If the titrant acts as indicator then it is called
 - (A) Internal indicator
 - (B) External indicator
 - (2) Self indicator
 - (D) Neutralization indicator
 - (E) Answer not known

146. Match the species group with the correct percentage of species threatened with extinction according to the IUCN Red List:

Species Group

Percentage Threatened

- (a) Amphibians
- 1. 12%
- (b) Reef-building corals
- 2. 41%

(c) Birds

3. 44%

(d) Mammals

- 4. 26%
- (b) (d) (a) (c) 3 4 1 3 1 2 (C) 2 3 1 4 2 3 (D) 1
- (E) Answer not known

147. Match the fish with the Migration type

- (a) Tuna
- 1. Anadromous Migration
- (b) Carps
- 2. Catadromous Migration
- (c) Eels
- 3. Potamodromous Migration
- (d) Salmons
- 4. Oceanodromous Migration
- (a) (b) (c) (d)
- (A) 3 4 2 1
- **(B)** 4 3 2 1
- (C) 2 3 4 1 (D) 1 3 4 2
- (E) Answer not known

148. Assertion [A]: Ex situ conservation involves cultivation of plants and rearing of animals outside their natural habitat.

Reason [R]: It is done through botanical gardens, zoos, DNA banks for the conservation of species specific of genetic diversity of endangered species.

- (A) Both [A] and [R] are false.
- (B) [A] is true but [R] is the not correct explanation of [A].
- Both [A] and [R] are true and [R] is the correct explanation of [A].
- (D) [A] is false, but [R] is true.
- (E) Answer not known
- 149. Assertion [A]: India is a great hotspot of Biodiversity.
 - Reason [R]: The richness of biodiversity in India is due to a wide variety of climatic and altitudinal conditions.
 - Both [A] and [R] are true and [R] is correct explanation of [A].
 - (B) [A] is false, but [R] is true.
 - (C) [A] is true, but [R] is false.
 - (D) Both [A] and [R] are true, but [R] is not the correct explanation of [A].
 - (E) Answer not known

- 150. Which of the following best describes genetic diversity?
 - (A) Variation in genes within a species across its range
 - (B) Number of species in a forest
 - (C) Variety of ecosystems in a country
 - (D) Interaction between species in a habitat
 - (E) Answer not known
- 151. Habitat fragmentation leads to biodiversity loss mainly because:
 - (A) It creates more water bodies for aquatic life
 - It isolates populations, making reproduction and gene flow difficult
 - (C) It increases competition and food supply
 - (D) It promotes species mixing and hybrid vigor
 - (E) Answer not known
- 152. Which of the following tiger subspecies is listed as extinct according to the IUCN Red list?
 - (A) Bengal Tiger

(E) Siberian Tiger

🌠 🛮 Bali Tiger

- (D) White Tiger
- (E) Answer not known

153. Assertion [A]: In C₄ plants, Carbon dioxide is initially fixed in the mesophyll cells to form four – carbon compounds.

Reason [R]: The enzyme Rubisco catalyzes the fixation of CO_2 with phosphoenol pyruvate (PEP) in C_4 plants.

- (A) Both [A] and [R] are true and [R] is the correct explanation of [A].
- (A) is true, but [R] is false.
- (C) [A] is false, but [R] is true.
- (D) Both [A] and [R] are true, but [R] is not the correct explanation of [A].
- (E) Answer not known
- 154. Assertion [A]: Diazotrophs improve soil fertility and support plant growth.
 - Reason [R]: They fix atmospheric nitrogen into ammonia, which can be used by plants for synthesizing proteins.
 - Both [A] and [R] are true and [R] is correct explanation of [A].
 - (B) [A] is true, but [R] is false.
 - (C) Both [A] and [R] are true, but [R] is not the correct explanation of [A].
 - (D) [A] is false, but [R] is true.
 - (E) Answer not known

155. Match the following soil moisture terms with their correct descriptions:

Terms

Descriptions

- (a) Gravitational water
- 1. Water held very tightly by soil particles, unavailable to plants
- (b) Capillary water
- 2. Water that drains quickly through large pores due to gravity
- (c) Hygroscopic water
- 3. The soil moisture condition after drainage when water is most available to plants
- (d) Lento capillary point
- 4. Water held in small pores, retained by surface tension and available to plants

	(a)	(b)	(c)	(d)
(26)	2	4	1	3
(A) (B)	2	4	3	1
(C)	1	2	3	4
(D)	1	2	4	3

- (E) Answer not known
- 156. The hydroxylated products of phase-I are converted to soluble metabolites by coupling with polar agents in phase-II of detoxification reactions by a process called conjugation. Which of the following is not a conjugating agent?
 - (A) Active sulfate
 - (B) Active Glucuronate
 - (C) Active Methionine
 - Active Bicarbonate
 - (E) Answer not known

(A) Alan (P) Level (C) β ₂ – (D) N – (E) Ans Match the (a) Carci (b) Muta (c) Terat (a) (2) (B) 2 (C) 1 (D) 1 (E) Ans Coenzyme (A) NAI (B) FAI (NAI (C) FMI	in blood. (A) Alanine and (P) Levulinate (C) β ₂ – microg (D) N – acetylg (E) Answer not (E) Answer not (E) Answer not (E) Mutagens (C) Teratogens (a) (b) (C) 2 3 (B) 2 1 (C) 1 2 (D) 1 3 (E) Answer not (E) NAD (E) NAD (E) NAD (E) FAD (E) NADPH (D) FMN	in blood. (A) Alanine aminotra (P) Levulinate dehyd (C) β ₂ – microglobulin (D) N – acetylglucosa (E) Answer not know Match the following: (a) Carcinogen (b) Mutagens (c) Teratogens (a) (b) (c) (b) 2 3 1 (c) 2 3 1 (d) 2 3 (d) 3 2 (e) Answer not know Coenzyme for cytochrom (A) NAD (B) FAD (B) FAD (C) NADPH (D) FMN	in blood. (A) Alanine aminotransferase (B) Levulinate dehydratase (C) β ₂ – microglobulin (D) N – acetylglucosaminidas (E) Answer not known Match the following: (a) Carcinogen 1. (b) Mutagens 2. (c) Teratogens 3. (a) (b) (c) (b) 2 3 1 (c) 2 3 1 (d) 2 3 (d) 2 3 (e) 1 2 3 (f) 1 3 2 (f) Answer not known Coenzyme for cytochrome P 456 (A) NAD (B) FAD (C) NADPH (D) FMN	

160.	22	empound is used to detoxify the cd-poisoning through chelation apy is				
	(A)	S aminolevulinic acid dehydratase				
	(D)	(Na ₂ Ca (edta)				
	(C)	Mg Ca (edta)				
	(D)	Pb – BAL complex				
	(E)	Answer not known				
161.		er which of following conditions the bioaccumulation of a ant is the maximum in aquatic animals?				
	A	Higher the body weight of the organism				
	(B)	Lower the body weight of the organism				
	(C)	Water body with high temperature and low salinity				
	(D)	Toxic species is near the surface water				
	(E)	Answer not known				
162.	At th	e upper limit tolerance of toxicant exposure				
	(A)	NO organism can survive				
	(B)	25% total organism can survive				
	(0)	50% total organism can survive				
	(D)	100% total organism can survive				
	(E)	Answer not known				
163.		is a polycyclic aromatic hydrocarbon which have carcinogenic activity.				
	(A)	Benzene (B) Pentacene 3.4, benzphenanthrene (B) Benzo-α-pyrene				
	(C)					
\$7 <u>0.0500</u> 80000 ×	(E)	Answer not known				
		onmental Science, 62 d Chemistry				

×.

164.		ch of the following is not egradabality under different sp				testing	the	
	(A)	The American Society for Testing and Material (ASTM)						
	(B)	International Organization for Standardization (ISO)						
	(C)	Draft of International Standar	rd (I	OIS)				
	(B)	World Health Organisation (WHO)						
	(E)	Answer not known						
165.		he absence of oxygen, anaer adation many xenobiotic compo				s carry	out	
		Reductive Degradation	(B)	Oxidative	Degra	adation		
	(C)	Photo Degradation	(D)	Bio Conce	ntrati	ion		
	(E)	Answer not known						
166.	The l	End products are secreted by fu	ngi.	Which is k	nowr	ı as		
	(A)	Plant enzyme	(B)	Animal en	zyme			
	(C)	Co enzyme	Jb)	Endo enzy	me			
	(E)	Answer not known						
167.	The l	Biocontrol agent of Trichoderm	a be	longs to wh	ich p	lant grou	ıp?	
	(A)	Fungi	(B)	Algae				
	(C)	Nematodes	(D)	Lichen				
	(E)	Answer not known						

168.	Mat	tch the fol	lowing:					
	(a)	a) Amino acids			1.	Sucralose		
	(b)			2.	Amino acids			
	(c)			f	3.	Glycine Aspartame		
	(d)			c	4.			
		(a) (b)	(c)	(d)				
	(A)	1 2		4				
	(B)	4 3	2	1				
	(C)	4 1	2	3				
	(D)	3 4	2	1				
	(E)	Answer	not knov	vn				
169.	Citr	ric acid is	commerc	ially p	prod	luced by which type of Fermentation?		
	(A)	Solid st	ate ferm	entati	on	Submerged fermentation		
	(C)	Anaerol	bic ferme	ntatio	n	(D) Batch fermentation		
	(E)	Answer	not know	wn				
170.	Wh	ich of the	followin	g bio	ferti.	lizers of symbiotic is responsible for		
	N_2 f	fixing biof	ertilizer?)				
	(1)	Rhizobi	um, Frai	ntia				
	(2)	Rhizobi	um, Azos	spirill	um			
	(3)	Rhizobi	um, Pen	cilliun	1			
	(4)	Rhizobi	um, Ana	bena		2		
	(A)	(1) and	(2) are co	orrect		(B) (2) only correct		
	(C)	(3) and	(4) are co	orrect		(1) only correct		
	(E)	Answer	not kno	wn				
		ronmenta nd Chemi		,	6	54		

171.	All o	f the following statements about fermentation are true except					
	(A)	The process begins with glycolyses and ends with ethiulla products					
	(B)	The process begin with glycolyses and end with ethanol products					
	(3)	It is glycolyses process takes place in the cytoplasm					
	(D)	It is process that turns glucose into acid lactic or ethanol					
	(E)	Answer not known					
172.		Poxic metabolite found in contaminated nuts and stored grains is alled					
	(A)	Amptoxin (B) Aflatoxin					
	(C)	Tetanus toxin (D) Glycotoxin					
	(E)	Answer not known					
173.	The	contaminated liquid is draining from the landfill is called as					
	(A)	Land drops (Z) Leachates					
	(C)	FYM (D) Liquid gold					
	(E)	Answer not known					
174.	Boty	dinum toxin is a potent neurotoxin because it.					
		Inhibits the exocylosis and release neuro transmitter acetylcholine					
	(B)	Inhibits the enzymes acetylcholinesterase					

Stimulate the release of glutamate at the synapse

Increase the permeability neural membrane to sodium irony

(C)

(D)

(E)

Answer not known

175. Choose the correct statements given below:

- 1. <u>Streptococcal pneumonia</u> is gram negative bacterium.
- 2. The symptoms of pneumonia are chilling breathing difficulty and chest pain.
- 3. It affects the digestive system.
- 4. It is diagnosed by X-ray and Bacterium culture.
- (A) 1 and 3 are correct

(P) 2 and 4 are correct

- (C) 1 and 4 are correct
- (D) 2 and 3 are correct
- (E) Answer not known

176. Match the following:

Pathogen

- Disease caused
- (a) Claviceps purpurea
- 1. Late Blight
- (b) Xanthomonas citri
- 2. Phyllody
- (c) Phytoplasmas
- 3. Canker
- (d) Phytophthora Infestans
- 4. Ergot
- (a) (b) (c) (d)
- (A) 4 2 3 1
- (B) 3 4 1 2
- **(D)** 3 2 1 (D) 3 1 4 2
- (E) Answer not known

	1.	Angular leaf spot	-	Bacterial D	isease
	2.	Green scurf	_	Mycoplasm	Disease
	3.	Blast	_	Fungal Dis	ease
	4.	Phyllody	_	Algal Disea	ise
	(A)	1 and 2 are correct		(B)	1 and 3 are correct
	(C)	2 and 4 are correct	5	(D)	3 and 4 are correct
	(E)	Answer not known	l		9
178.	Yello	w plastic bag conta	inin	g biomedica	l waste are treated by
		Autoclaving		(B)	Micro oving
	(C)	Inertization		(D)	Encapsulation
	(E)	Answer not known	1		
179.	Strep	otococci produce two	o typ	e of haemol	ysis which is known as
		Streptolysin O and	1 S	(B)	Streptolysin H and S
	(C)	Streptolysin O and	ŀΗ	(D)	Streptolysin Suger
	(E)	Answer not known	1		
180.	Vibri	o cholerae was cult	ured	for the firs	t time by
	(A)	Louis Pasteur		(B)	Allison Gengan
	(9)	Robert Koch		(D)	Christopher Columbus
	(E)	Answer not known	1		

177. Choose the right matches among the following:

181.	Why	ocean "dead zones" are considered as a major environmental
	(A)	They have extremely cold water that freezer marine organism
	(B)	They contain toxic gases that immediately kill marine life
		They have very low oxygen levels, making it hard for most marine life to survive

- (D) They are too deep for sunlight, presently photosynthesis
- (E) Answer not known
- 182. Which of the following is does NOT contributor to marine pollution?
 - (A) Tanker operation

(B) Dry docking

(C) Tanker accidents

(D) Ocean currents

- (E) Answer not known
- 183. Why does cultural eutrophication occur in aquatic systems?
 - (A) Natural accumulation of sediments
 - (B) Decrease in aquatic plant growth
 - (9) Anthropogenic increase in nitrogen and phosphorous
 - (D) Climate change and rising temperatures
 - (E) Answer not known
- 184. How do carbamates act as broad spectrum pesticides?
 - (A) By blocking photosynthesis
 - By inhibiting Acetyl cholinesterase
 - (C) By Disrupting DNA synthesis
 - (D) By acting as a barrier
 - (E) Answer not known

Why are protected areas regarded one of the most effective tools for biodiversity conservation?								
(A) They exclude all human activity (B) They promote rapid industrial development								
They integrate ecological, cultural and social considera								
\$ 7								
86. Only one of the following does not match correctly, which one is it								
	A		В					
(A)	Gulf of mannar marine biosphere reserve		Tamil Nadu					
(B)	Mahatma Gandhi marine national park	111-111	Andaman and Nicobar Islands					
(C)	Sundarbans marine sanctuary	-	West Bengal					
	Karwar community reserve	-	Kerala					
(E)	Answer not known							
Why is a storm surge Hazardus during a cyclone?								
(A)	Causes permanent sea level rise							
(B)	Brings strong coastal winds							
	biodi (A) (B) (D) (E) Only (A) (B) (C) (E) Why (A)	 (A) They exclude all human active (B) They promote rapid industriate (C) They integrate ecological, culted (D) They focus only on endangere (E) Answer not known Only one of the following does not reach action and park (A) Gulf of mannar marine biosphere reserve (B) Mahatma Gandhi marine national park (C) Sundarbans marine sanctuary (E) Karwar community reserve (E) Answer not known Why is a storm surge Hazardus during 	(A) They exclude all human activity (B) They promote rapid industrial dev (C) They integrate ecological, cultural (D) They focus only on endangered an (E) Answer not known Only one of the following does not match A (A) Gulf of mannar marine — biosphere reserve (B) Mahatma Gandhi marine — national park (C) Sundarbans marine — sanctuary (C) Karwar community reserve — (E) Answer not known Why is a storm surge Hazardus during (A) Causes permanent sea level rise					

Triggers sudden coastal flooding and heavy damage

Lowers sea water salinity

Answer not known

(D)

- 188. The release of hatching reared young marine organisms into specific marine habitats to enhance natural populations for commercial or conservation purposes in known as
 - (A) Mariculture

(B) Sea ranching

(C) Restocking

(D) Aquaculture

- (E) Answer not known
- 189. Pulicut Lake is catagorized and utilized as IUCN category IV due to its characteristics
 - (A) It allows no human access
 - (B) It preserves large natural landscapes
 - It focuses on species and habitat management
 - (D) It protects unique geological features
 - (E) Answer not known
- 190. Identify the best way to describes meroplankton
 - (A) Spend their entire life cycle as plankton
 - (B) Always benthic and never driff on plankton
 - Spend only part of their life cycle as plankton
 - (D) Photosynthetic plankton
 - (E) Answer not known

- 191. Find out if there are incorrect statement about deep sea organisms.
 - (A) Animals feed on suspended solids found in the deep sea
 - (B) Few animals are passive suspended feeders
 - (C) Many deep sea animals are associated with chemosynthetic bacteria
 - The abundance of the benthic organism such as barnacles and common sponges increases with depth
 - (E) Answer not known
- 192. The following statements about ocean zones are correct:
 - 1. The euphotic zone allows enough light for photosynthesis
 - 2. The aphotic zone receives no sunlight at all
 - 3. The neritic zone is found over the continental shelf near the coast
 - 4. The oceanic zone refers to deep waters beyond the continental shelf
 - 1, 2 and 3 are correct
 - (B) 1 and 4 only correct
 - (C) 2, 3 and 4 are correct
 - (D) 1 and 2 only correct
 - (E) Answer not known

- 193. The following shows the correct sequence of the five key elements of disaster management.
 - 1. Response and Relief \rightarrow Preparedness \rightarrow Mitigation \rightarrow Rehabilitation \rightarrow Prevention
 - 2. Prevention \rightarrow Mitigation \rightarrow Preparedness \rightarrow Response and Relief \rightarrow Rehabilitation
 - 3. Mitigation \rightarrow Prevention \rightarrow Response and Relief \rightarrow Preparedness \rightarrow Rehabilitation
 - 4. Preparedness \rightarrow Mitigation \rightarrow Response and Relief \rightarrow Rehabilitation \rightarrow Prevention
 - (A) 1
 - (\mathbf{P}) 2
 - (C) 3
 - (D) 4
 - (E) Answer not known
- 194. How do sessile filter feeders benefit the sea grass ecosystem?
 - (A) They consume sea grass leaves directly
 - (B) They anchor the sea grass to the sediment
 - They filter particles from the water, improve water clarity
 - (D) They assist in pollinating the sea grass flowers
 - (E) Answer not known

- 195. Chemosynthetic bacteria obtain their primarily source of energy from
 - (A) Breaking down glucose in aerobic conditions
 - (B) Using solar radiation to power photosynthesis
 - Oxidising inorganic molecules like hydrogen sulfide
 - (D) Consuming plant matter in soil environments
 - (E) Answer not known
- 196. CRD gives accurate information if all the experimental units present in the experiment are
 - Homogeneous
 - (B) Heterogeneous
 - (C) Finite
 - (D) Infinite
 - (E) Answer not known
- 197. What does the F test is ANOVA for CRD indicate?
 - (A). The difference between individual treatment means
 - The overall difference between the treatments
 - (C) The variance within each treatment group
 - (D) The correlation between the treatments
 - (E) Answer not known

- 198. Let the attribute A have 5 categories and attribute B have 4 categories. Then in order to test their independence chi-square test is used for which error degrees of freedom will be equal to
 - (A) 20
 - **(B)** 12
 - (C) 15
 - (D) 16
 - (E) Answer not known
- 199. Two means are compared using t-test to assess the statistical significance of the difference between two samples. Size of the first sample is 17 and the size of the second sample is 13. How many degrees of freedom are associated with the critical t-value?
 - (A) 32
 - (B) 31
 - (C) 29
 - **(P)** 28
 - (E) Answer not known
- 200. Which of the following is not a measure of central tendency?
 - (A) Mean
 - (B) Median
 - Standard deviation
 - (D) Mode
 - (E) Answer not known
